How to find what you want

The resources are listed in country order even if the country is not the first word of the title, or not in title at all. For example, *Images of China* is grouped under 'C' with other resources on China. Thematic resources have been inserted in this alphabetic order. The index should help a search by the full title.

The descriptions are brief and avoid the hyperbole of publishers' blurb. Pupils' ages are given in preference to national specifics. Let us know your requirements and we will provide further information to ensure your purchase will match your curriculum needs.
